Product description

• The V-TAC R63 LED bulb with an E27 base has a 6-year warranty and uses advanced SMD CREE technology which ensures high reliability, long life and excellent light quality. CREE chips are a world leader in LED technology with over 35 years of experience and over 1800 patents, so they provide exceptional efficiency and durability. The 8.5W model is an energy-saving replacement for the traditional 60W halogen bulb. The luminous flux of 806 lumens and the beam angle of 120 degrees guarantee uniform illumination of residential and commercial spaces. The bulb is made of durable materials ensuring lightness and easy installation, and its long life of 25000 hours makes it an ideal choice for many years of use.
