Product description

• The V-TAC LED bulb with an E14 base has a 6-year warranty and uses modern SMD CREE technology, ensuring high reliability, operational stability and durability. The new generation of bulbs with CREE chips guarantees exceptional light quality, high efficiency and precision. CREE LED is a world leader in LED technology with over 35 years of experience and 1800 patents. The bulb replaces the traditional halogen light source with a power of 50W, consuming much less energy while maintaining high brightness. The lifetime is 25000 hours, ensuring long-lasting operation in everyday applications. The structure is made of durable materials, ensuring lightness and easy installation. The bulb is ideal for home and commercial lighting, including living rooms, living rooms, decorative spaces, receptions and lounges.
