Product description

- Innovative LED strip with 170 degree lenses for better dispersion of the light flux
- High quality SMD LED 2835
- Roll length 5 meters
- Width 11mm
- Voltage 24V - To ensure an even stream of light along a long piece of strip without the need to add an additional power source every 5 meters, LED strips with a voltage of 24V are the best choice. Thanks to this solution, you will avoid problems with voltage reduction and noticeable changes in the light color.
