Product description

• The V-TAC LED bulb with a GU10 base uses stable SMD technology, which ensures high reliability and long-lasting operation. The product replaces the traditional 60W halogen bulb, offering much lower energy consumption while maintaining appropriate brightness and light quality. The structure is made of durable materials, ensuring lightness and easy installation, allowing for quick installation of the bulb in a standard GU10 socket. The lifespan is 20000 hours, allowing for long-term use in domestic and commercial installations. The bulb is perfect for lighting hotels, bars, service premises, apartments and exhibition stands.
