Product description

• The V-TAC LED ceiling lamp with two integrated light heads was designed for modern residential and commercial interiors. The structure made of metal, aluminum and acrylic gives the frame an elegant matte black look and ensures durability in everyday use. The built-in LED sources generate a total of 1440 lumens and emit light with a color temperature of 3000K. A wide beam angle of 280 degrees makes the light spread evenly around the room. The luminaire is intended for indoor use and is suitable for hotels, restaurants, apartments, commercial premises and modern decorative spaces. Its minimalist form and the quality of materials create functional lighting tailored to contemporary arrangements.
