Product description

• The V-TAC hanging lamp in black combines modern style with a simple, elegant form. The lampshade made of ceramics has a smooth, rounded shape and a matte surface that gives the fixture a decorative character. The upper part of the lamp made of metal harmoniously complements the ceramic lampshade, creating a coherent, minimalist whole. The fixture uses a standard E27 base, which enables quick installation and selection of the light source. Thanks to the adjustable height of up to 1.5 meters, the lamp can be adjusted to different heights of rooms. The product is intended for indoor use and is perfect for modern apartments, hotels, restaurants and stylish commercial spaces. The combination of ceramics and metal ensures durability and an aesthetic appearance suitable for modern interiors.
