## Product description

• The V-TAC hanging lamp with three built-in LED modules has been designed as an elegant element of modern interiors. Three spherical white lampshades suspended on wires create a light, decorative composition. Brushed nickel elements add a modern, aesthetic character to the setting. The structure made of ceramics, metal and acrylic is durable and looks good in residential and commercial spaces. Built-in LED sources with a power of 3x10W generate a total of 3600 lumens, emitting warm light of 3000K. A wide beam angle of 280 degrees ensures even illumination of the room. The lamp is adjustable in height up to 1.5 meters, which allows it to be adapted to various interior arrangements. The product is intended for internal use and is suitable for hotels, restaurants, apartments, living rooms and decorative spaces.
