Product description

• The V-TAC floor lamp was designed as a modern lighting element for bedrooms, living rooms and elegant office spaces. The slim form and the combination of a white lampshade with a brushed nickel finish give the fixture a light, minimalist character. The structure made of ceramics, metal and acrylic is durable and looks aesthetically pleasing in modern arrangements. The built-in LED module with a power of 10W generates 1200 lumens and provides a warm light color of 3000K. A wide beam angle of 280 degrees allows for soft and even illumination of the room. The lamp intended for indoor use will work as both decorative and functional lighting.
