Product description

• The V-TAC wall lamp with an up-down light direction has a 3-year warranty and is a modern replacement for traditional façade fixtures. The cylindrical body made of black aluminum presents a minimalist, elegant style suitable for contemporary facades and outdoor corridors. The structure uses a standard 2xGU10 base, which allows for a two-way lighting effect that decoratively highlights the wall. The IP44 rating provides protection against weather conditions, making the luminaire suitable for outdoor use and in semi-open spaces. The lamp is intended for illuminating passages, paths, stairs, terraces and corridors, offering an effective and practical stream of light directed upwards and downwards.
