Product description

• Smart Controller V-TAC for CREE CCT LED strips has a high-quality control system and a wide input voltage range from 5V to 24V, which ensures stable operation and compatibility with various LED installations. The device works with the BanlanX application and enables voice control via Google Home and Amazon Alexa, which allows you to create comfortable intelligent lighting scenes. The controller offers brightness adjustment, CCT color change and lighting effects using a wireless remote control with 19 buttons. The maximum output current 2A in Single Channel PWM mode ensures precise control of LED strips. The compact design is intended for indoor use and works well in modern home and commercial installations. The product is compatible with all CREE CCT LED strips.
