WARNING

1. Please make sure to turn off the power before starting the installation.
2. Installation must be performed by a qualified electrician.
3. Cover or shield any adjacent live components.
4. For indoor use only.

INSTALLATION

1. Switch off the power.
2. Install the product on the wall with two enclosed inflated screws.
3. Connect the sensor with power supply and the load as per the connection-wire diagram. Then turn on the power and test it.

WIRING DIAGRAM

1. When the door opening (>5cm), the lights will be turned on.

2. When both of the 2 doors being closed, the lights will be turned off

To get better sensitivity, you can paste one silver label as picture on the door facing to the sensor

TEST

Turn on the Power, when you open 1 door or 2 doors, the sensor detects the motion and turns on the lights. The lights will be switched off until both of the 2 doors are closed.

NOTE

Within the detection field, there shouldn't be any hindered or unrest objects affecting detection.
